

Pitch (English)

Tomtly – Executive Summary

The platform that sells plots others can't

NOPS AS (Konsepthus AS) · Org.nr 933 819 086

Jakob Bjøndal · jakob@tegnebua.no · +47 406 03 908

tomtly.no · tomtly.no/investor

The Problem

Every year, thousands of Norwegian landowners list their plots on Finn.no (Norway's leading classifieds site) and receive zero serious bids. The reason: buyers can't understand what they're actually buying. A plot is not an apartment. Its value depends entirely on what can be built there, what it will cost, and what the finished property can sell for.

This information exists — spread across 15+ government databases — but gathering and interpreting it takes 2–5 working days of expert time per property.

All 4 of Tomtly's paying customers had previously listed on Finn.no without success.

The Solution

Tomtly is a complete sales platform for plot owners. When a seller joins, Tomtly delivers in under 30 seconds what previously took days:

- **Regulatory analysis** – AI-interpreted planning regulations for all 356 Norwegian municipalities
- **House models** – 3–6 real house models with prices from actual suppliers (ABChus, Blink Hus, Mesterhus, etc.)
- **Cost calculations** – Complete budget from plot to finished home, including groundwork and fees
- **Visualizations** – Facade images and floor plans tailored to the plot
- **Sales page** – Professional listing on tomtly.no with full transparency for buyers
- **Seller dashboard** – Platform for managing buyer communication, interest registration, and bids

Revenue model: NOK 4,990 setup fee + 2% of sale price (+ VAT) upon sale. No sale = no 2%.

Two-Sided Platform – Seller AND Buyer

Tomtly solves both sides of the transaction, creating a network effect:

For buyers (plot seekers):

- **We find plots for you:** Daily automated search through Finn.no, municipal case systems and cadastral data. Registered buyers are notified immediately when a matching plot appears.
- **We calculate total costs:** Most buyers don't know what groundwork, house and municipal fees cost combined. Tomtly delivers a complete cost estimate for the specific plot.
- **You see what you can build within your budget:** Enter total budget → Tomtly shows matching house models with prices, floor plans and calculations.

Network effect: More buyers → faster sales for sellers → more sellers join → better supply for buyers. This two-sided market dynamic makes Tomtly scalable far beyond one-to-one sales.

Proven Traction

- **4 paying customers** (May 2026), all with failed Finn.no listings
- Live property pages: bjornemyrveien-20, bjornemyrveien-22, plus 2 private seller dashboards
- **Norkart AS** (Norway's largest mapping company): letter of intent for distribution
- **Placepoint** (NOK 60M ARR, 2 acquisitions in 2025): test access given Feb 2026, partnership negotiations ongoing
- Sister company Tegnebua: 120+ architecture projects/year as natural pipeline

Market Opportunity

| Segment | Norway (Annual) |

|-----|-----|

| B2C plot sellers (5,000+ on Finn.no at any time) | NOK 5–15M |

| B2B real estate agencies (subscriptions, 800 offices) | NOK 20–50M |

| B2B banks (pre-valuation per analysis) | NOK 25–100M |

| PropTech API licenses (Placepoint, etc.) | NOK 5–20M |

| **Norwegian SAM** | **NOK 65–185M** |

Nordic market (Sweden, Denmark, Finland — same regulatory complexity): NOK 300–800M.

Technology Moat

15+ Norwegian government API integrations in one platform. Anthropic Claude AI for regulatory interpretation. Full coverage of all 356 municipalities — including a unique integration with Oslo's own PBE planning system (which no competitors offer). Analysis time: under 30 seconds vs. 2–5 days manually.

Team

Jakob Bjøndal — Founder & CTO. Licensed architect and self-taught full-stack developer. Runs Tegnebua architecture firm (120 projects/year). 10+ years interpreting Norwegian planning regulations. Built Tomtly entirely from scratch.

Funding Ask

Source	Amount	Status
-----	-----	-----
Innovasjon Norge – Market Validation	NOK 750,000	Applying
Skattefunn (R&D tax credit)	~NOK 200,000	Applying
Own funds (NOPS AS / Tegnebua)	NOK 400,000	Committed
Customer revenue	NOK 150,000	Estimated
Total 12-month budget NOK 1,500,000 		

Use of funds: 40% technology, 30% B2B market validation (brokers + banks), 20% team, 10% legal/compliance.

12-month milestones: 100 paying customers · ARR NOK 1.2M · B2B broker and bank pilots live · Placepoint integration operational.
